CNET INSTRUCTION 4614.1L

Subj: UNIFORM MATERIAL MOVEMENT AND ISSUE PRIORITY SYSTEM  
(UMMIPS)

Ref: (a) OPNAVINST 4614.1F  
(b) NAVSUPPUB 437  
(c) CNETINST 8011.1B

Encl: (1) Force Activity Designators (FADs) Assigned to CNET  
Activities  
(2) Guidelines on Upper Limits for High Priority  
Requisitions

1. Purpose. To assign FADs to Chief of Naval Education and Training (CNET) activities, and to supplement reference (a) as it affects those activities.

2. Cancellation. CNETINST 4614.1K

3. Background. Reference (a) established a UMMIPS for movement, requisitioning and issue of material to ensure that requirements are processed in accordance with the military importance of the requiring activity and the urgency of need (UND).

4. Assignment. The assignment of FADs contained in enclosure (1) is made in consonance with reference (a) after consideration of pipeline training pressure points, extent of material support required and attained, and after an analysis of available evidence has shown that all other material management techniques have been utilized but have not satisfied requirements.

5. Action

a. CNET; Chief of Naval Air Training (CNATRA); and  
Commander, Naval Training Center (NTC), Great Lakes.

(1) Review FAD assignments assigned to subordinate commands and the percentage limitations in enclosure (1) annually to determine their validity. CNATRA, NTC Great Lakes, and CNET direct reporting activities shall submit recommended changes to CNET (OS4) prior to 15 March each year.

(2) Maintain a record of FADs assigned to subordinate commands.

(3) Assign an expiration date to all temporary FAD assignments.

(4) Ensure that command inspections of Naval Education and Training Command (NAVEDTRACOM) activities and detachments include a specific review of UMMIPS priority designators, on a sample basis, to determine compliance with reference (a).

b. Commanding Officers and Officers in Charge

(1) Be responsible for the assignment of correct priority designators within authorized FAD assignments listed in enclosure (1) as well as the validity of required delivery dates (RDD).

(2) Either personally review, or delegate in writing to specific personnel the authority to review, all UND A requirements and certify an inability to perform the assigned mission. This review will be accomplished prior to the transmission of requisitions to the supporting supply source (SSA).

(3) Delegate in writing to specific personnel the authority to review all UND B requirements (except Casualty Reports (CASREPs)) to certify the urgency of need was accurately determined. This review will be accomplished prior to the transmission of requisitions to the SSA.

(4) Ensure that every effort is made to stay within the requisition priority designator 01 through 08 percentage goal depicted in enclosure (2).

(5) Accord prompt and thorough handling to requests received from SSAs to validate outstanding requisitions. Establish external and internal Material Obligation Validation (MOV) and follow-up procedures on outstanding requisitions in accordance with reference (b).

(6) Incorporate in local training programs a specified training requirement on the purpose and use of UMMIPS. Participation in this training program will include military and civilian personnel who determine urgency of need for requisitioned material or who process requisitions.

(7) Issue specific guidance necessary to identify mission essential equipment, and a table of specific criteria (similar to the tables in enclosure (2) of reference (a), applicable to the activity, for selecting UNDS.

(8) Require that a monthly UMMIPS performance report be prepared indicating the percentages of total requisitions generated under priority designators 01 through 03, 04 through 08, and 09 through 15 during the previous month. Reports should be simple statements of mathematical percentages. These reports should be retained for one year for inspection purposes.

(9) Ensure priority 15 (FAD V) is assigned to all ammunition MILSTRIP requisitions. Reference (c) provides guidance for priority assignments upon requisitioning ammunition/explosives to support curriculum training or (Naval Security Forces/Auxiliary Security Forces (NSF/ASF)).

c. The quantity of material included on priority designator 01 through 08 requisitions will be restricted to that amount necessary to satisfy the immediate end-use requirement. Additional quantities required to replenish stock will be requisitioned under the appropriate priority designators 09 through 15.

The use of any other priority designator for stock replenishment is prohibited.

d. NAVEDTRACOM activities may request a FAD change from CNET (OS4) via the chain of command. Requests for higher FADs will be made only after a thorough analysis indicates that no available alternative will satisfy requirements. Each request must cite complete justification including:

(1) Current effect of FAD assigned on support capability;  
and

(2) Noncompatibility of FAD assigned with activity mission requirement.

e. Requests for a one-time use of higher FAD to support a specific requirement should be made by telephone to CNET (OS4), DSN 922-4848/4797 or commercial (850) 452-4848/4797.

6. Reports. The reports required by this instruction are exempt from reports control by SECNAVINST 5214.2B.

**FORCE ACTIVITY DESIGNATORS (FADs) ASSIGNED TO**  
**CNET ACTIVITIES**

1. FAD I. Fleet training activities and programs as separately assigned by higher authority (TRIDENT Program, Submarine Surveillance Equipment Program, etc.).

2. FAD II

a. Fleet training activities and programs as separately assigned by higher authority (such as the TRIDENT Program, etc.).

b. Navy Flight Demonstration Squadron, T45A/C, F/A-18A, TF/A-18A, KC-130, T-2C aircraft and F404-400, F405-RR-401, T56/6G/16P/16T, J85-4A series engines.

3. FAD III

a. Training aircraft/engines and/or aircraft/engines used directly in support of flight training not authorized higher FAD in accordance with paragraphs 1 and 2 above.

b. Helicopters (including engines) used exclusively for Search and Rescue (SAR) operations.

c. Aircraft in a ferry status down mechanically in the CNET area of responsibility. In cases where the aircraft custodian has a higher FAD, the higher FAD shall be used.

d. NAVEDTRACOM activities involved in specialized training (initial skill, skill progression, and functional/fleet training) not authorized a higher FAD in accordance with paragraphs 1 and 2 above. For Non-Combat Expenditure Allocations (NCEA), refer to paragraph 5c of this enclosure.

e. Naval Air Maintenance Training Group and Naval Air (R) Maintenance Training Group detachments in direct support of fleet training.

f. Emergency medical or disaster supplies or equipment required to save lives or prevent suffering.

g. NAVEDTRACOM activities supporting simulators, trainers, and technical training equipment.

h. Naval Construction Battalion Units when required to maintain capability of being organizationally deployed with its organic allowance within a maximum of 10 days.

i. Submarine Training Facilities not authorized higher FAD in accordance with paragraphs 1 and 2 above.

4. FAD IV

a. Naval Air Technical Training Center for direct support of aviation training.

b. Naval Technical Training Unit, Keesler.

5. FAD V

a. Naval Air Maintenance Training Group Detachments not cited in paragraph 3e.

b. All other activities within the NAVEDTRACOM including those supporting aircraft not cited in paragraphs 3a, 3b, and 3c of this instruction.

c. All requests for training ammunition, unless directed by higher authority, will be processed using FAD V designators. Any deviation to this established guideline will be requested from CNET (OS414) prior to requisitioning ammunition citing higher priorities than authorized herein.

6. Simulators directly associated with the CNET flight training program are assigned the same FAD designator as the aircraft they simulate or the aircraft involved in the same phase of pilot/ Naval Flight Officer training.

7. Activities providing direct support to a unit with a higher FAD shall honor requisitions for specific requirements using the priority authorized to be used by the requiring activity.
